

Barricades

Flexible Control

All construction projects need ample barriers to prevent mishaps on job sites. Pedestrian barricades (also known as “bike barricades”) are a sensible solution that can assist with the flow of pedestrian and vehicular traffic while safely securing restricted areas.

Strong and durable, each barricade is made of **heavy-duty welded steel** with a corrosion-resistant galvanized finish. Multiple units can be easily joined together through a **convenient hook and sleeve system** to form a rigid and secure barrier over long distances such as public walkways and parking lots, and to protect equipment.

Contact one of our construction specialists today for more information on the many uses barricades can provide on your next job site.

Features & Benefits

- Made of Durable, Lightweight Steel
- Portable & Freestanding
- Easy to Install, Reposition and Remove
- Utilizes Hook & Sleeve Joining System
- No Digging, Posts or Sandbags Needed

Specifications

- Hot Dipped Galvanized Construction
- 16-Gauge Steel, Corrosion-Resistant
- Width: 78.5" Height: 43"
- Weight: Approx. 42 lbs
- Large Tube: 1.5" Diameter

Uses

- Commercial Construction
- Housing Developments
- Remodels & Tenant Improvements
- Public Works Projects
- Post-Disaster Reconstruction
