

# Temporary Power

## Power Up Your Job Site

Many construction projects require temporary power as an essential part of developing a new job site. Not only is a reliable power source critical for a project's success, but so too is the expertise necessary to install it. As a **low-cost** alternative to generators, National's power technicians are experienced in the installation of **overhead or underground** temporary power for a variety of uses.

With an assortment of power options including single and three phase systems, high voltage needs, telephone wiring, as well as stringer, sub poles, and stand-up electrical cabinets, call the power professionals at National Construction Rentals today.
