

Toilet/Power Combo

One Powerful Portable

Designed for a job site with limited space and when a standard temporary power pole cannot be installed, our Toilet/Power Combo serves as both a construction toilet and a temporary power source. This 21st century marvel can connect to any overhead or underground electrical source with a 10-foot mast (for overhead connections) or sweep (for underground connections).

If space is an issue, National's Toilet/Power Combo is the perfect solution. Call a National Customer Service Representative today for more information on this and other portable toilet and power options for your next project.
