

20' Mobile Storage Container

More Stuff? More Storage.

With high value tools and inventory routinely used on construction projects, National's 20-foot Mobile Storage Containers become a job site necessity for general contractors and construction trades alike.

Manufactured from **14-gauge heavy-duty steel**, each of National's storage containers are built to resist inclement weather while providing a **spacious interior** to keep assets safe and secure. A large entryway allows easy access to supplies, while non-slip wood flooring provides safe passage in and out of every portable storage unit we offer.

With the convenience of being portable, our storage containers can easily fit next to a job site trailer, behind a retail establishment, near an office complex and on virtually any solid, level surface.
