

# Barricades

## Flexible Control

Large public events need appropriate crowd control. Pedestrian barricades (also known as “bike barricades”) are a perfect solution, assisting the flow of pedestrian and vehicular traffic while safely securing restricted areas.

Strong and durable, each barricade is made of **heavy-duty welded steel** with a corrosion-resistant galvanized finish. Multiple units are easily joined together through a **convenient hook and sleeve system** to form a rigid and secure barrier over long distances, such as ticket lines, parking lots and parade routes. Barricades are also great for adding security to VIP areas, concerts, golf tournaments and more.

Contact one of our event specialists today for more information on the many uses barricades can provide for your next event.

## Features & Benefits

- Made of Durable, Lightweight Steel
- Portable & Freestanding
- Easy to Install, Reposition and Remove
- Utilizes Hook & Sleeve Joining System
- No Digging, Posts or Sandbags Needed

## Specifications

- Hot Dipped Galvanized Construction
- 16-Gauge Steel, Corrosion-Resistant
- Width: 78.5" Height: 43"
- Weight: Approx. 42 lbs
- Large Tube: 1.5" Diameter

## Uses

- Concerts, Fairs & Festivals
- Parking Lot Vehicle Management
- VIP Areas & Restricted Enclosures
- Vehicle & Pedestrian Control
- Graduation & Award Ceremonies
