

Fence Security Options

Peace of Mind

When your event requires additional security to protect materials, valuable equipment, tools and excess inventory, National Event Services has a full complement of fence security options to choose from.

Sand Bags

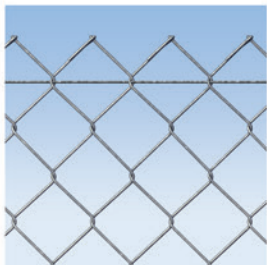

Made of tightly woven nylon fabric, Sand Bags are useful in **adding stability** and preventing movement to fence panels. Weighing in at a hefty 34 lbs., Sand Bags are often used near areas with a heavy pedestrian presence, in areas prone to high winds and when windscreen is used.

Sand Bags are typically placed on panel stands to provide maximum support and minimum interference.

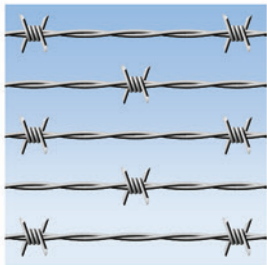

Top Rail

Top Rail adds **additional strength** and provides the look of permanent fencing without the high price of similar security options.

Tension Wire

Tension Wire strengthens the fence and prevents it from being damaged from illegal entry if accessed from above, or if installed below, secures the base of the fence.

Barbed Wire

3-Strand Barbed Wire is a **superior security deterrent**, sending a strong visible and physical message to anyone who might want to attempt to gain illegal access to your event site.

Features & Benefits

- Reinforces Overall Stability
- Provides Visual Deterrence
- Discourages Theft & Vandalism
- Fortifies Perimeter Security
- Delivers Peace of Mind

Specifications

- Galvanized Steel Construction
- Top Rail: 1 3/8" Diameter
