

Holding Tank

Sink attached to fresh and wastewater holding tanks.

Reliable Reservoir

Used both as a fresh source and a gray water repository, National Event Services' holding tanks are the perfect solution for short and long term special events. Made of **high-quality, impact-resistant** polyethylene, National Event Services' holding tanks provide outstanding performance regardless of climate, terrain or site conditions.

Constructed with **internal pillars and reinforced corners**, National's holding tanks will stand up to the rigors of sliding, dragging and other challenging environments. All fittings are molded in place and all connections and ports are set back to guard against the wear and tear of daily use or months of being in the elements. Further, each holding tank is designed to be connected concurrently so adding more units is a breeze. Translucent in color, each tank is designed to do its job with as little oversight as possible so you can focus on your job at hand. Call it peace of mind. Call it National Event Services.
